

Job Title	Supplier Quality Engineer
Business Unit / Group Function	OBU
BU Team / Sub-Function	Quality
Location	SBP
Leader	Supplier Quality Area Leader
People Leadership	NA
Job Level	4B
Role Purpose	
<p>To work closely with WGS material suppliers to optimise material performance and align supplier manufacturing capability to the requirements of both high-speed manufacturing and a premium quality portfolio. To ensure material quality issues are investigated appropriately and that root cause is determined and CAPA are implemented and maintained.</p>	
Accountabilities	
<ul style="list-style-type: none"> • Work closely with and support manufacturing teams, to provide support and expertise on major material performance issues and to ensure specification requirements are aligned to the requirements of a high speed, premium quality operation. • Work collaboratively with procurement and NPD to set specifications and standards, and support NPD activities within the supply base that optimize material quality across the end-to-end WGS supply chain. • Contribute to the assurance of packaging quality through engaging in a program of supplier audit, delivery of quality standards and ongoing supplier development. • Nurture and build action-oriented partnerships with key suppliers to further develop material performance and optimise standards of quality. • Update and maintain both Component Quality and Delivery Standards. " • Facilitate the qualification and formal assessment of new suppliers, ensuring they meet the specification requirements and quality standards to support WGS P&SC operations. • Maintain the supplier audit schedule in line with QMS requirements, working collaboratively with Compliance team to conduct scheduled audits in a timely and accurate manner and to support suppliers with non-conformance resolution. • Investigate material quality related customer complaints with suppliers, establish root cause, and ensure that robust preventative actions are implemented. • Maintain and develop Supplier Non-Conformance Management systems, ensuring effective communication of issues with the supply base and validation and verification of implemented corrective and preventative actions. 	

- Maintain the key Supplier Quality performance metrics of MDN's/MDR's and Supplier Audit, accurately reporting weekly/monthly as necessary, using the data to drive supplier development initiatives
- Update and maintain Supplier Quality process maps and process documentation in accordance with the WGW governance structure and the requirements of our QMS.
- Work collaboratively with peers and colleagues, coaching and developing Quality Technicians, Line Leaders and Lean teams in Material Quality Standards.
- Apply learnings from identified training and development activities required to perform in role.
