Take responsibility for product deve provide the required product functio Accountabilities		
provide the required product functio Accountabilities		
Accountabilities	nality to meet business requirements.	
Accountabilities		
Design algorithms and flowcharts to create new software programs and producing efficient and		
elegant code based on business requirements		
Creates, refines and updates technical product specification and documentation and documents		
source code and configurations accurately		
Reports implementation progress, performance and risks to (agile) product team and Product		
Owner outlining any improvements required in a timely manner		
Reviews functional and non-functional requirements and designs for development in line with		
 business requirements Implements and configures the product according to specification and design successfully ensuring 		
implementation quality, flexibility and effective performance		
 Provides input on capacity forecasts, effort, duration and requirements for development activities 		
in line with business requirements		
Consults with Technical Dependency Management and Deployment, Change & Test Management		
of the Product group ensuring busin		
• Participates in (agile) meetings and collaborates closely with the agile team in the respective Team		
• Collaborate with different roles within the product team (i.e. DevOps, QA / Test Engineer) to ensure		
timely and quality resolution of issues		
 Closely cooperates with external service/ solution providers to develop appropriate product 		
functionalities		
Manages the adaptation resulting from changed business requirements or performance		
improvements to required standards		
Identifies and shares best p	practice within developer community - both internal and external, to	
	utions are implemented meeting business standards
